Subject: Oatman

As of late last week, we do not yet have results from resampling of existing well or of the inactive well for proposed blending pending results. Samples were collected in early June and sent to lab in Wisconsin. Oatman posted public notice at post office and allegedly provided info with monthly bill statements. ADEQ is working with their site cleanup program proposes to use the multi-purpose grant for targeted sampling of small communities adjacent to military sites or industry uses.

I've got a bi-weekly with Alexis and Debbie tomorrow and was hoping to give her an update on the following. Could you send me a few bullets on each:

- 1) Small systems strategy (status and substance – themes?)
- 2) PFOA/PFOS: status of systems that are above the 70ppt and actions being taken (Is it still Oatman, Guam and CNMI?)
- 3) UIC: Any new info. on UIC AE packages coming in for review? Mesa Grande status?

Thanks!
